

**Girlguiding Safeguarding Training
Level 4 Training for staff**

04.12.2023

Feedback at end of session:

How has the session been for you? One thing you are going to do as a result of today's training...

Useful reflection on how to do best practice in managing safeguarding. I find it super useful to remember that it's not always clear.

This session has been very useful for me, not because I will often be in a position to need the level 4 training, but because it will help me manage volunteers I work with who have level 3 or 4 training

Brilliant session - thanks Jill & Siobhan.

Useful to think through scenarios, and helpful to think about what things are like for volunteers I manage

Good energy session, not spoon-fed - interactive enough! Going forward: continue to check in on colleagues in my department under my care, and encourage safe spaces to talk/reflect.

Remember the Batari's box scenario going forward too

Thank you - just brought things to front of my mind also going to discuss staff welfare in managers meeting.

Going to do:

1 - make sure team processes link in with Safe Practise

2 - culture of safeguarding - I think this is essential to building common language, expectations and ideas. Build this within my team and the wider department

- Always a pleasure being training by you Jill, I find the frequent breakouts and break and helpful to absorb information.
- Going forward I will make sure that I'm focusing on secondary trauma a bit more

Really relaxed training in a safe environment.

Great to refresh and understand the boundaries and overlaps with volunteering and your staff role

Thank you!
